CUSTOM LOCKER STORAGE

EASY TO CLEAN

TOUCHLESS RFID LOCKS

Today's healthcare environment is a changing landscape and this needs to be reflected in staff and patient storage solutions. Spacesaver Solutions Inc.'s lockers are custom made, offering different sizes, materials, locks, colours, and finishes to suit your needs. Antimicrobial finishes and easy to clean corners make our lockers the perfect option for sterile environments, and our touchless locks make keeping everyone safe easy.

PHARMACY STORAGE

In the ideal hospital supply room or pharmacy, techs have fast access to items through organization and optimized space. Our modular bin storage systems and shelving are designed to accommodate constantly fluctuating inventory and make the most of limited space. They can be configured on the spot and reconfigured as needed without tools and fasteners.

PANDEMIC SUPPLY STORAGE

Balancing storage needs with space for patients is a challenge. If you're running out of space, or having a hard time accessing all your supplies, high density storage is a great option! High density systems get rid of static aisles by placing shelving and cabinets on carriages that move back and forth on rails in the floor. Simply push a button or turn a handle, and the aisles will move allowing you to easily access all your stuff.

Compact mobile shelving lets you store your sterile supplies in a fraction of your current space. This gives you the opportunity to dedicate more of your space to patients.

PATIENT RECORDS

Consolidate medical records, X-rays and sensitive documents in central, supervised areas close to the point of need with our high density storage solutions. Control access, increase accountability, better manage files, and limit the likelihood of their improper use.

RECORDS MANAGEMENT

80% of records management costs are related to labour and not supplies or equipment. The best way for healthcare facilities to save money is to become more efficient. We offer the advice, products, and services, that will make your records management program work for you!

We will conduct a fact finding meeting at no cost to understand your current state. We will then analyze this information and make recommendations that will mitigate risk and save you time and money.
