TOUCH TECHNOLOGY CONTROL™

BY SPACESAVER

Experience Spacesaver's LCD touchscreen technology

From cell phones and tablets to ATM machines and airport kiosks, LCD touchscreen technology has become part of our daily lives. Striving for optimum ease-of-use and security, Spacesaver offers our own LCD touchscreen called, Touch Technology Control™. The control is the standard on our Eclipse Powered System® mobile storage, but is also available on ActivRAC® 7P mobilized systems and Wheelhouse® mobile storage.

The 4.3" touchscreen displays images with great clarity and rich color, along with providing many additional benefits and features.

TOUCH TECHNOLOGY CONTROL™ BENEFITS:

EASE OF USE: Touch Technology Control makes our powered mobile systems easier to use than ever, with:

- Built-in tutorials: *User tutorials are built into the system, acting as a virtual Owner's Manual. Tutorials customized to user specific applications can also be added*
- Voice prompts and button click sounds, both with volume control
- Interactive and dynamic screen with menu, arrows, stop signs, and other intuitive icons and colors: *Symbols and colors change to display the available system movements and menu options available at any given time*
- Complete system audit log can be downloaded, and the screen's customized logo or image can be upgraded through one single control. Each control does not have to be programmed separately
- Touch anywhere on screen to stop system motion
- System diagnostics displayed directly onto touchscreen
- Setup Wizard: *No computer or software needed to setup system and manage users. Desired features can be accessed directly on the touchscreen and only take a few minutes to activate.*
- Icon buttons to easily control aisle and bay lighting of aisles

TOUCH TECHNOLOGY CONTROL™ ADDITIONAL BENEFITS:

CUSTOMIZABLE OPTIONS:

Customizable LCD interface. Contact Spacesaver to find out how custom graphics, colors, screensavers, and languages can be customized to fit specific application needs

SAFETY & SECURITY:

Controlled audit access is available via a PIN-code or card authorization, making it an ideal system for a variety of markets and high-security applications. Audit log is easy to access and read with any spreadsheet program or text viewer

INSTALLATION: LCD interface fits into base control cutout, eliminating the need for new face panels in the event of an upgrade. Tamper-proof screws are used in place of standard screws for added security of the LCD interface
